Erlangen, 22.07.2022

Dear colleagues,

We are glad to announce that the annual School for Astroparticle Physics will be back in action after two years of Covid-enforced break. The 17th edition of the School will take place from 5th to 13th October 2019 in Obertrubach-Bärnfels. With this school, we aim to offer young scientists the opportunity to acquire in-depth knowledge on topical developments in astroparticle physics and to learn about adjacent fields such as astrophysics, particle physics and cosmology. A further goal of the School is to stimulate contacts between participants and lecturers to strengthen long-term cooperation and networking in the community of astroparticle physicists.

Please note that the School will be fully held in English and is suitable for international participants. Registrations from abroad will be welcome even though we are aware that, given the time scale, obtaining a visa in due time may be difficult in some countries.

Please find attached the first bulletin of the School as well as corresponding announcement posters. We would like to ask you to inform your colleagues about this event and, if possible, to display the posters in your institute. We would highly appreciate if you could encourage interested PhD or Master's students to participate in the School. Please don't hesitate to contact us whenever you have questions or suggestions.

Kind regards,

*Prof. Dr. Stefan Funk, Prof. Dr. Uli Katz, Dr. Alison Mitchell, Prof. Dr. Anna Nelles,
Prof. Dr. Manami Sasaki, Prof. Dr. Christopher van Eldik, Prof. Dr. Jörn Wilms*
